

Thank you for signing up to Cozy Magic Home, where we take practical steps to make your home feel magical!

I believe there is no right or wrong way to decorate, but sometimes getting your space to look and feel how you want can be an overwhelming process.

The questions in this workbook are the same ones I asked myself when I started to decorate our home. It helped me to figure out not only what kind of home that would serve my family, but that I also really loved. I know I'm not the only one who feels like this, so I decided to make this free workbook for anyone who felt like me!

The only real advise I have for you is that you be completely honest in your answers, and take your time answering the questions.

If you share your home with others, it maybe worth noting their thoughts too, so we can make a happy home for everyone!

Here is to you, for taking steps to making your home a cozy, magical haven.

Enjoy!

Make a list of the rooms/areas of your home.
Write out what each room in your home is used for and who the room is mostly used by

How do the individual spaces in your home (noted in day 1) make you feel?

How would you like them to feel?

What is your favorite item in your home (e.g. bed, sofa, dining table etc)? Why?

What colors and/or textures dominate your home? How do they make you feel?

Create a vision board for each room in your home (either on paper or online)

What reoccurring themes/elements/colors etc did you notice from your vision board? Did any of them surprise you?

What practical steps can you incorporate your vision board and what you already have?

Congratulations on completing this workbook!

I hope you found this workbook useful, and are now have a clearer idea of how you want your home to look and feel.

If you would like to build on all you have explored here, please come join us at CozyMagicHome.com

Brimming with with all types of projects, Cozy Magic Home takes the guess work out of DIY projects for you to save you time, money, and take you straight on to flexing your creative muscles!

We would love to see you there!
